INSIGHT WORKSHOP:

HOW TO DESIGN A SUCCESSFUL ERDF PROJECT

Every successful ERDF project starts with great design. It's a crucial process that a lot of teams find difficult – but our experts can get you on the right path. Our tried and tested workshop delivered in house offers clear guidance, tools and techniques all aimed at helping you to create a viable ERDF project.

We take incredibly complex and frankly sometimes dull project strands and make them interesting, simple and enjoyable to understand, including match funding, keeping in line with policy, additonality, outputs, impact results and compliance.

You will gain insight into successful projects and learn the necessary skills to help ensure your project ticks all of DCLGs boxes. Despite popular misconceptions you CAN create innovative improvements to existing services, and our workshop covers all elements of project design within the "creative space" ERDF allows.

All our workshops can be delivered in one day, or over 2 half days.
